Forecast for Wednesday 09 Feb 2022

Weather: Snow showers more frequent and heavier than Tuesday, always more focused across western peaks such as the Paps of Jura and Ben More where there will be a risk of hail and thunder.

Chance of cloud-free hill tops above 800m: 20% with only occasional clearances these not lasting long.

Low Cloud and visibility: Good away from showers quickly falling poor or very poor in showers, only a few meters in hill fog which sporadically lowers 450m as showers push through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Difficult to hazardous conditions with severe wind chill and buffeting winds at height, bringing temporary blizzard conditions.

Forecast for Thursday 10 Feb 2022
Weather: Wintry showers, turning to rain below 300m for a time during the morning, frequent at first, particularly in the west and north. Outbreaks tending to ease from mid-day.

Maximum wind: West 35-40mph with gusts reaching 55mph across most exposed ridges and summits, easing a little from late morning.

Chance of cloud-free hill tops above 800m: For any given time 75% becoming 90% later, but virtually nil for extended periods due to the showery nature of the airstream.

Low Cloud and visibility: Good or very good becoming poor or very poor in showers, only a few meters in hill fog which sporadically lowers 300m as showers push through.

Temperature: **Glens:** Minus 2 Celsius increasing plus 6 Celsius for a time mid-day
At 800m: Minus 4-5 Celsius increasing minus 2 for a time during the morning
Freezing level: 200-300m lifting 500m for a time during the morning
